DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 3, 4, 6-9, 11-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,212,465. Although the conflicting claims are not identical, they are not patentably distinct from each other because some claims are broader than others are.

3. Claims 1, 3, 4, 6-9, 11-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of Patent No. 6,285,945. Although the conflicting claims are not identical, they are not patentably distinct from each other because some claims are broader than others are.

Specification

The disclosure is objected to because it does not specify in the first line of the specification that this application is a continuation of US application 09/867,824, patent 6,285,945. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zierolf, US Patent no. 6,178,370.

As per claims 1 and 9, Zierolf teaches how to determine the speed of the vehicle; and setting a maximum allowed vehicle deceleration based on vehicle speed (abstract).

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Saito et al., US Patent no. 5,835,878.

As per claim 1, Saito et al. teaches how to determine the speed of the vehicle; and setting a maximum allowed vehicle deceleration based on vehicle speed (abstract).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3661

- Fukada, US Patent No. 6,139,120 discloses a roll control device of vehicles with braking estimated and trimmed by separate parameters.
- Nakashima et al., US Patent No. 5,931,546 discloses a vehicle motion control system.
- Matsuda et al., US Patent No. 6,141,617 discloses a vehicle control apparatus.
